

# Kiwa BCS Öko-Garantie GmbH and SATAS (South African Technical Auditing Service) enter into cooperation for the region of South and East Africa

SATAS and Kiwa BCS Öko-Garantie GmbH are looking forward to working together to support manufacturers of organic food, feed and agricultural products from South and East Africa with export to the European Union, the USA, Japan and many other regions!

Since it was founded in 1991, Kiwa BCS has relied on international connections and is still present in more than 20 countries through its own offices. Kiwa BCS has been offering organic and sustainability certifications in South and East Africa since 1997 and can count on a large and loyal customer base.

Kiwa has been working with SATAS since 2019 to help local importers and international manufacturers of construction products exporting from Europe to South Africa to obtain the necessary certifications and approvals as quickly and efficiently as possible. In December 2021, Kiwa is intensifying its cooperation with SATAS in the area of inspecting organic and processing plants. With the cooperation with SATAS, our customers will now have a permanent contact person on site for administrative matters, which means that the customer relationship can be strengthened and expanded.

“We look forward to this new partnership with SATAS and are confident that this is an important step to strengthen our relationship with our customers - and to underline our commitment throughout the South and East African region. In the future, local customers will be able to benefit even more from the broad portfolio of the Kiwa Group ”- says the Kiwa BCS management team.
