ISO 17065 ACCREDITATION.

Accreditation is granted per Standard. We as a Certification Body have to apply to SANAS and achieve accreditation on the standard applied for, prior to the display of the SANAS logo on a product permit issued by SATAS.

We may only use the SANAS logo on a permit for a product standard if it is covered by the Scope of our SANAS Accreditation Certificate.

The use of the SANAS logo on any permit without the approval of SANAS will be regarded as fraud.

Likewise the use of the SATAS Logo by a manufacturer that is not SATAS certified for the particular product also constitutes fraud.

As in the past we will take legal action to protect our certification mark if used without our permission. Your support by informing us of any suspected misuse of the SATAS certification logo will be appreciated.

DUAL CERTIFICATION

Definition: Dual certification means the certification of the same product manufactured on the same premises to the same standard by two different ISO 17065 accredited certification bodies.

For example: A SATAS certified manufacturer that manufactures pipe to the requirements of SANS XYZ is also certified by another certification body for the same product standard (SANS XYZ) on the same premises.

For obvious reasons dual certification is not acceptable to SATAS.

Currently a manufacturer has a choice of three different ISO 17065 accredited certification bodies in the plastic pipe industry, three in the Timber industry and two in the steel industry.

The scope of accreditation for each Certification Body is available from the SANAS web page:

ISO 17065 AKKREDITASIE

Akkreditasie word per standard uitgereik. SATAS as n sertifisering liggaam moet by SANAS aansoek doen en akkreditasie bekom vir die spesifieke standaard alvorens die SANAS logo op n permit wat deur SATAS uitgereik word vertoon mag word.

Ons mag die SANAS logo slegs vertoon op n permit vir produkte wat op die bestek van die SATAS akkreditasie soos deur SANAS uitgereik verskyn.

Die gebruik van die SANAS logo sonder toestemming op enige permit sal as bedrog beskou word.

Om dieselfde rede word dit as bedrog beskou indien die SATAS logo gebruik word op produkte waarvoor die vervaardiger nie deur SATAS gesertifiseer is nie.

Soos in die verlede sal SATAS regstappe neem om ons logo te beskerm teen onwettige gebruik. Jou ondersteuning om ons in te lig van enige misbruik van die SATAS sertifisering logo sal waardeer word.

DUBBEL SERTIFISERING

Definiesie: Dubbel sertifisering bedoel die sertifisering van dieselfde produk op dieselfde perseel volgens dieselfde spesifikasie deur twee verskillende ISO 17065 ge-akkrediteerde sertifiserings liggame.

Voorbeeld: n SATAS gesertifiseerde vervaardiger wat pyp vervaardig volgens die vereistes van SANS XYZ is ook gesertifiseer deur n ander sertifisering liggaam vir dieselfde produk standard (SANS XYZ) in dieselfde aanleg.

Om voor die hand liggende redes is dubbel sertifisering nie vir SATAS aanvaarbaar nie.

Tans het n vervaardiger n keuse tussen 3 ISO 17065 ge-akkrediteerde sertifisering liggame in die plastiese pyp bedryf, drie in die hout bedryf en twee in die staal bedryf.

Die bestek van akkreditasie vir elke ge-akkrediteerde Sertifisering liggaam is op die SANAS webblad beskikbaar. www.sanas.co.za

Groete
Abe Stears
